

Field Officers Recruiting two self-employed electrical inspectors for East (Colchester area) and Central London.

Start Date: 01/10/18

Self-employed, sub contracted, based on number of assessments in area

Working Hours: Based on number of members/assessments in postcode areas. Each assessment is typically ½ day

Locations: As per posting, one for Central London and the other East London (Colchester)

Main Purpose of the Role

We are offering the opportunity to become part of the Inspection Team as a self-employed Field Officer to work within our electrical schemes, inspecting and assessing our members.

Job Description:

Primarily responsible for the assessment of Electrical Installers against the Electrotechnical Assessment Specification, wiring and Building Regulations and Standards. Knowledge of renewable and heating/plumbing technologies would be an advantage for branching into renewable assessments. Be part of a growing assessment team with a firm aspiration for top spot in the market.

You will be based from your home and local postcode area and possibly required to stay away on occasion.

Job Requirements:

You must have qualifications, experience and a thorough technical understanding of electrical and Building Regulations. You will be required to be IT literate and understand corporate culture and workings. You will need to be hard working, helpful to clients and open to change, development and opportunity. Effective communication and a friendly approach is key. Previous assessor experience an advantage.

You must have an ability to display innovation, leadership and inspiration with the ability to work as part of a team or on your own, with good planning, prioritisation and communication skills.

Essential Experience:

- Hold a relevant recognized qualification (HNC/NVQ /City & Guilds / Technical Certificate for example)
- The successful applicant must be experienced in Industrial and Domestic Electrical Installations and Inspection and Testing work
- Previous experience and knowledge of Renewable Technologies an advantage
- Knowledge of the Building Regulations/Standards
- Hold a full British driving licence
- Effective communication skills with people at all levels (both written and verbal)
- Basic IT skills, using Microsoft products such as Outlook, Word and Excel
