## ASSESSMENT

For plumbing work, assessments will be arranged based on the scopes applied for below. Assessment includes competence and installation work against the Minimum Technical Competence document. Where the scope includes EEM work assessments will be against the standard PAS2030.

Column A is used to identify how many site assessments are needed and column B to determine the detailed scope of certification. It is assumed that all the items in column B will be available to assess competence on the visit (generally the most complex system will be seen). If the visit requires more than one site only those within a 30 minute journey will be valid without further charges.
