This Guide is for use with the NAPIT Application Forms for electrical operatives, it is not a guide about electrical qualifications ingeneral or for joining any organisations or schemes other than those shown on the form.

The document that details the requirements for certification and registration bodies (including qualifications) is the Electrotechnical Assessment Specification (EAS) for use by Certification and Registration Bodies. This Guide expands on the EAS October 2024 and the EAS Qualifications Guide - June 2025 by giving details of actual qualifications issued (both current and withdrawn) that meet its requirements.

The EAS work categories are as shown in the table below. In addition, this Guide provides information about qualifications recognised by NAPIT in electrical work not covered by EAS.

Index of Qualification Lists against scope of Registration

EAS Work Categories: For full details of the scope of the work categories above refer to Appendix 1 Table A1.1 of the EAS	**Underpinning Core Technical Competence**		**Wiring Regulations**	**Initial Verification**
	Dwellings	**All**		
	Lists 1/2/3	**Lists 2/3**	**List 4**	**List 5**
A1 Electrical installations up to and including 1000 V AC or 1500 V DC				
A1.1 Dwellings (BS 7671)	✓	✓	✓	✓
A1.2 Other than Dwellings (BS 7671)		✓	✓	✓
A1.3 Temporary electrical systems (BS 7909)*		✓	✓	✓
A2 Periodic inspection and testing: List 6				
A2.1 Dwellings (BS 7671)	✓	✓	✓	
A2.2 Other than Dwellings (BS 7671)		✓	✓	
A3 Electric Vehicle Charging Equipment (EVCE) Installation: List 9				
A3.1 Dwellings	✓	✓	✓	✓
A3.2 Other than Dwellings		✓	✓	✓
A4 Solar Photovoltaic (PV) Systems Installation: List 13				
A4.1 Dwellings	✓	✓	✓	✓
A4.2 Other than Dwellings		✓	✓	✓
A5 Electric Energy Storage Systems (EESS) Installation: List 14				
A5.1 Dwellings	✓	✓	✓	✓
A5.2 Other than Dwellings		✓	✓	✓
A6 Micro Wind Turbine Installation				
A6.1 Dwellings	✓	✓	✓	✓
A6.2 Other than Dwellings		✓	✓	✓

*A1.3 also requires BS 7909 training included in List 8

Electric Energy Storage Systems (EESS) Installation	List 14	A5.1/A5.2
Micro Wind Turbine Installation	List 15	A61./A6.2

©NAPIT Registration Ltd

The application form asks you to use Codes from one or more of the fifteen lists included in this Guide, please pay careful attention to the notes on the application form to see which parts of the form you need to complete.

To use this guide, look for the qualifications you hold in the following tables where you will find a **NAPIT Code** in the left-hand column, then use this code on the application form. If you have more than one qualification in a particular list, please indicate the one most recently awarded. The columns to the right hand of the tables give information that could help you to identify the qualification from the awarding body named on the certificate or the Ofqual number if it is shown.

ECS Cardholders
Qualifications referenced in Lists 1 to 6 may be evidenced by the individual providing their ECS card information (either ECS card number, image or CPD record) which can be freely verified using the ECS Check systems or CSCS Smart Check App.
An ECS Registered Electrician Gold Card with the occupation of Installation Electrician, which will show the relevant edition of BS 7671, may be sufficient to demonstrate the qualification requirements in Tables A4.7 to A4.10. A grading of Approved Electrician may be sufficient to demonstrate compliance with the qualification requirements of List 6.
An ECS Card with the occupation of Maintenance Electrician may be suitable, only if the underpinning qualifications held align with the requirements of Lists 1 to 6.
Where an ECS card is or has been held, ECS can verify if an individual's qualifications are sufficient when qualification certificates are inaccessible or unavailable. If a Certification / Registration Body wishes to develop an application programming interface (API) into the ECS database for automated verification of qualifications held, further information can be sought by contacting ECS directly here.
Please note, the JIB/SJIB ECS card alone is not sufficient evidence of meeting the qualification requirements, the card will need to be verified via ECS, and evidence retained.

If you have a qualification that you believe demonstrates electrical competence, but it is not listed, please contact NAPIT. We can review it, but cannot make a decision on a qualification that is not listed in the EAS Qualifications Guide.

Such a review may not be conclusive and might indicate the need for work by other agencies such as the awarding body for the qualification, the Sector Skills Agency responsible or, in the case of an overseas award the UK ENIC, operated and managed by Ecctis Limited

Important note for anyone applying as an EXISTING OR PREVIOUS (last 2 years) REGISTERED COMPETENT PERSON

Registration is available for someone transferring existing registration from another certification body or registering within two years of any previous registration with NAPIT or another certification body. Provided evidence is available of previous successful assessment(s), the scope of registration in this case will be the same as that currently/previously held, and the only qualifications evidence required is the Wiring Regulations Qualification from List 4 of this guide. If applying for a higher scope than previously held (e.g. previously a Domestic Installer but applying for All Electrotechnical Work), the qualifications requirements must be met and application form sections D, E, F and G must be included on the form.

©NAPIT Registration Ltd

Important note about RESPONSIBILITY requirements

Other than someone with existing or recent registration, applicants must have demonstrable evidence of 2 years' responsibility for technical standards of electrotechnical work and evidence of ongoing Continuing Professional Development. A person applying to undertake Periodic Inspection and Testing will be required to have at least 2 years' evidence of undertaking periodic inspection and testing, plus evidence of ongoing Continuing Professional Development. Section G of the application form can be used for this, although NAPIT may ask for further evidence. Practical experience gained whilst undergoing training is valid.

Important note about SITE ASSESSMENTS

Qualifications or certificates of competence are required for registration, but competence itself must be demonstrated in practice, and the site assessment element of the application process must also be satisfactorily completed. If the assessment finds weaknesses or evidence of a lack of competence NAPIT can require additional or repeat training and assessment to complete registration.

Important note about Qualifications from outside the UK

Qualifications from outside the UK

When an Qualified Supervisor applicant has been trained outside the UK they need to demonstrate that they have fully met the same UK qualification standards as if they had been trained in the UK.

The Electrotechnical Skills Partnership (TESP) and ECS have developed a new service with the qualifications recognition body Educational Counselling and Credit Transfer Information Services (Ecctis), formerly known as UK Naric, that will map non-UK electrical qualifications against the specific knowledge requirements of the Experienced Worker Assessment referenced in this Qualifications Guide.

The Electrotechnical Experienced Worker Assessment enables those who trained outside of the UK to demonstrate they meet the requirements of the relevant underpinning core technical competence referred to in List 1.

In many cases, the applicant's existing qualifications will be recognised. However, in all cases, existing qualifications must be assessed and verified that they meet the same criteria as the UK requirements by taking the Ecctis Electrotechnical Skills Statement.

The service will provide the Qualified Supervisor applicant with an 'Industry Skills Statement' – further information can be found on the Ecctis website.

There will be no exemptions from the practical performance elements – even if the Qualified Supervisor applicant has significant practical experience of working overseas, they will still need to be working in the UK to complete the practical elements of the Experienced Worker Assessment. Practical assessments must be completed using work within the UK which can be verified/observed.

©NAPIT Registration Ltd

LIST 1 - **Underpinning Core Electrical Competence, limited to dwellings only**

This is suitable for electrotechnical work applications within dwellings. This qualification also covers Initial Verification, so you will not need an additional qualification from list 5.

Since the 1st of January 2019 it has been a requirement to hold a separate BS 7671 18th Edition qualification unless it can be evidenced that the qualification taken included the 18th Edition. The evidence will be subject to review by NAPIT.

List 1: Underpinning Core Technical Competence, limited to Electrotechnical work in dwellings only (A1.1) (EAS Table A4.7 Route 1)				***For information***

**LCL Awards is a trading name of Logic Certification, qualifications may have been previously issued in this name.
***Either no longer available to new learners or no longer awarded.

LIST 2 - Underpinning Core Technical Competence, all Electrotechnical Work including dwellings

This is suitable for all electrotechnical work including in dwellings. These qualifications also cover initial verification so you will not need an additional qualification from list 5.

Since the 1st of January 2019 it has been a requirement to hold a separate BS 7671 18th Edition qualification unless it can be evidenced that the qualification taken included updates to the BS 7671 18th Edition. The evidence will be subject to review by NAPIT.

The reference to geographical region indicates where a qualification was available, the qualifications are acceptable for any region of the UK.

Was EA212-07	R2		The Electrician's Certificate	*C&G*	*N/A*

*Formal training programmes prior to 1994 will probably have followed an apprenticeship training programme. If this is the case, the final Apprenticeship Completion Certificate, Deeds or Diploma can be provided in lieu of the FICA, AM, AM1 or AM2. Applicants may also present more recent apprenticeship completion certificates from various issuing authorities without evidence of the underpinning technical qualifications or end point assessment certification. In these circumstances, the Certification or Registration Body must present each individual applicant details to The Electrotechnical Skills Partnership for verification against historical records. A formal decision notice will be issued.

Pre 1995 AM2 was issued in Scotland. From the summer of 1995 FICA was introduced, therefore AM2 is acceptable for qualifications issued before this time.

* The Level 3 Installation / Maintenance Electrician apprenticeship qualifications (C&G 5357 / EAL 7345) and Level 3 NVQ diploma (C&G 2357 / EAL 1605) include the requirements of Table A4.9. If separate qualification certificates have not been issued, the Awarding Organisation or training provider can provide evidence.
**LCL Awards is a trading name of Logic Certification, qualifications may have been previously issued in this name.

©NAPIT Registration Ltd

LIST 5 - Initial Verification (INSPECTION AND TESTING)

This is an additional qualification required for work in dwellings unless you have completed a Level 3 Certificate or Diploma from lists 1 to 2 which included initial verification. If you have a qualification from list 6 that combined Initial Verification and Periodic Inspection and Testing, you do not need a qualification from this list.

LIST 5a – Initial Verification (INSPECTION AND TESTING) (EAS Table A4.10) Dwellings only		***For information***

LIST 7 - Portable Appliance Testing

If you have applied for Portable Appliance Testing, you must have one of the following qualifications (none of the other lists cover PAT requirements).

If your company has applied for "Managing the Maintenance of Electrical Equipment" they will need to provide evidence that someone within the company has a Level 3 in "Management Requirements for the Maintenance of Electrical Equipment" for which the following listed qualifications are a pre-requisite.

LIST 7 – Portable Appliance Testing		***For information***	
NAPIT Code	**Qualification Title** *Exact titles may vary from one awarding body to another*	***Awarding BodyNotes***	***Qualification Numbers (Ofqual)***
EP701	Level 3 Award in the In-Service Inspections and Testing of Electrical Equipment (PAT)	*C&G 2377-22*	*600/3597/3*
EP702	Level 3 Award in the In-Service Inspection and Testing of Electrical Equipment (PAT)**	*EAL*	*600/4340/4*
EP703	Level 3 Award for In-Service Inspection and Testing of Electrical Equipment**	*LCL Awards**	*601/0491/0*
EP704	Level 3 Certificate in Inspection and Testing of Electrical Equipment (Code of Practice for In-Service Inspection)	*C&G*	*100/1235/7*
EP705	Level 3 Certificate for the Inspection and Testing of Electrical Equipment (Code of Practice for In-Service Inspection)	*C&G 2377-12*	*100/4339/1*
EP706	Level 3 Certificate in In-Service Inspection and Testing of Electrical Equipment (PAT)	*EAL*	*500/7547/0*
EP707	Level 3 Award in the In-Service Inspections and Testing of Electrical Equipment (PAT)	*C&G 2377-32*	*600/3597/3*
EP708	Level 3 Award in the Management Requirements for the Maintenance of Electrical Equipment	*C&G 2377-32*	*600/3528/6*
EP709	Level 3 Award in the In-Service Inspection and Testing of Electrical Equipment	*C&G 2377-77*	*603/6790/8*

*LCL Awards is a trading name of Logic Certification, qualifications may have been previously issued in this name.
**EP702 and EP703 qualifications pre-date the new Code of Practice and as applicants holding these will need to pass the OAS and on-site assessment.

LIST 8 - Temporary Electrical Installations to BS 7909

If you have applied for Temporary Electrical Installation work you must have attended training and competence assessmentspecific to demonstrate knowledge, understanding and application of BS 7909.

LIST 8 - Temporary Electrical Installations to BS 7909		***For information***	
NAPIT Code	**Qualification Title** *Exact titles may vary from one awarding body to another*	***Awarding BodyNotes***	***Qualification Numbers (Ofqual)***
ET801	Temporary Electrical Systems (3-day course for new entrants)	*C&G Accredited NA7909-3 PTA7909-3*	N/A
ET802	Temporary Electrical Systems (1 day course for experienced workers)	*C&G Accredited NA7909-1 PTA7909-1*	N/A

LIST 9 - Electric Vehicle Charging Equipment (EVCE) Installation to BS 7671

If you have applied for Electric Vehicle Charging Equipment (EVCE) Installation work you must have attended training and competence assessment specific to demonstrate knowledge, understanding and application of BS 7671 and IET Code of Practice (CoP) Electric Vehicle Charging Equipment Installation.

LIST 9a – Electric Vehicle Charging Equipment (EVCE) Installation to BS 7671 (EAS Table A4.12) in Dwellings only		***For information***

LIST 11 - Inspection, Testing and Certification of Communications Cabinets / ICT Cabinets

If you have applied for INSPECTION, TESTING AND CERTIFICATION OF COMMUNICATION CABINETS / ICT CABINETS work you must have attended training and competence assessment specific to demonstrate knowledge, understanding and application of BS 7671 in relation to ICT Cabinets.

LIST 11 – Inspection, Testing and Certification of Communications Cabinets / ICT Cabinets		***For information***	
NAPIT Code	**Qualification Title** *Exact titles may vary from one awarding body to another*	***Awarding Body Notes***	***Qualification Numbers (Ofqual)***
NA-ICT	Understanding the Requirements to Inspect, Test, Certify and Report Electrical Installation to Communications Cabinets/ICT Cabinets	*C&G Accredited*	N/A

LIST 12 - Insufficient Qualifications

This lists technical knowledge qualifications that are commonly presented by applicants but held alone, are insufficient. Technical knowledge qualifications are important to demonstrate understanding. However, the guiding principle is that qualifications are required which evidence sufficient workplace performance with robust assessment to demonstrate occupational competence, in line with recognised industry standards. Other qualifications may have electrotechnical content, however, are more focused on engineering disciplines and therefore do not fully align with the EAS lists 1-6.

LIST 12 – INSUFFICIENT QUALIFICATIONS		***For information***	
NAPIT Code	**Qualification Title** *Exact titles may vary from one awarding body to another*	***Organisation / Awarding BodyNotes***	***Reason***
IQ-001	Certificate in Electrotechnical Technology Level 3	*C&G 2330*	These are classroom-based technical knowledge qualifications. They are part of / a pre-requisite to acceptable work-based evidence qualifications, such as the Installation / Maintenance Electrician or Domestic Electrician apprenticeship, Level 3 NVQ with AM2 or the Experienced Worker Assessment (EWA) all with the relevant version of AM2 (AM2S, AM2 and AM2E respectively).
IQ-002	Certificate in Knowledge of Electrical Installation Engineering Level 3	*C&G 2351*	
IQ-003	Diploma in Electrical Installations (Buildings and Structures)	*C&G 2365*	
IQ-004	Level 3 Advanced Technical Diploma in Electrical Installations (Buildings and Structures)	*C&G 8202-30*	
IQ-005	Level 3 Diploma in Electrical Installation	*EAL 9331*	
IQ-006	National Certificate Building Services Engineering (Electrical Installations)	*BTEC*	
IQ-007	Level 3 Diploma in Commissioning and Installation	*EAL 0733*	Focused on installation of lifts / hydraulics / escalators
